WHAT DO WE KNOW ABOUT COLLAGEN?

The collagen present in food is a chain of about 3,000 pieces of amino acids. General collagen supplements consist of a chain of about 30 to 100 pieces of amino acids. Those 2 types of collagen are too big to be absorbed by our intestines. They are delivered into our body after digestion by gastrointestinal enzymes.

S.GEN MAXICOLLAGEN is derived from farmed fish, the pure collagen is treated with unique hydrolysis process to produce maximum amount of Tripeptides. **MAXICOLLAGEN** Tripeptides are a unit of collagen consists of 3 amino acids. They differ from conventional collagens - it is directly absorbed by the intestinal tract.

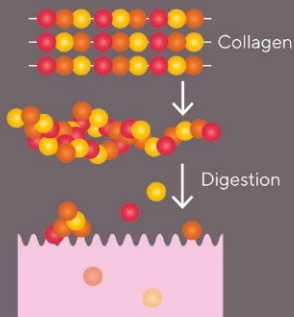

S.GEN MAXICOLLAGEN TRIPEPTIDES

MAXICOLLAGEN is quickly absorbed because it has the minimum unit size (3 amino acids) as body's collagen.

OTHER COLLAGEN PEPTIDES

Conventional peptide is too big to be absorbed due to its molecular weight. Those are absorbed after decomposition by digestive enzyme in the body.

MAXIMUM ABSORPTION

S.GEN MAXICOLLAGEN is only 1/9 of the size of red blood cell, enhances bioavailability efficiency without complicated digesting process.

Emulsified size
1-3 μ m

Red blood cell size
9 μ m

S.GEN IS MORE THAN JUST COLLAGEN

Collagen

Oral UV

3 KEY INGREDIENTS

MAXICOLLAGEN
Collagen-boosting effect

BLACKBERRY EXTRACT
Lightens UV spots and
improves skin brightness

SYNERGENE™ ANTI-UV
Increase the cell viability
against UV damage

Formulation

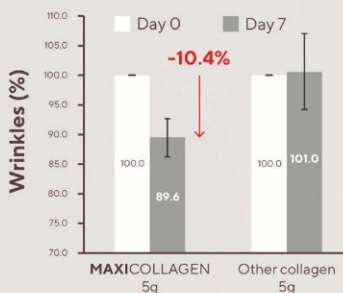

**ADVANCED
DELIVERY SYSTEM**

7 DAYS EXTREMELY EFFECTIVE

MAXICOLLAGEN Collagen-Boosting Effect _____ 7days, 13.0%↑ Collagen

MAXICOLLAGEN Anti-Wrinkle Effect _____ 7days, 10.4%↓ Wrinkle

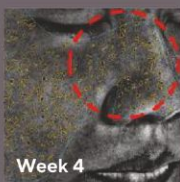

BLACKBERRY EXTRACT

Lightens UV Spots

4weeks, 2.4%↓ UV Spots

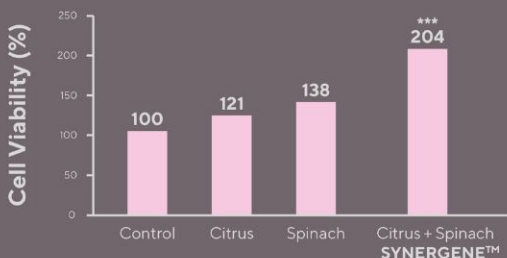

8weeks, 4.1%↓ UV Spots

SYNERGENE™

Anti-UV Blend

Increase The Cell Viability Against UV Damage
